Telephone: 81-33-508-2721

Fax: 81-33-508-2730

Director General: Mr. Ichiro Kato

Unlike other MITI-related “nonprofit” patent organizations, IIP is not under the supervision of the Patent Office. IIP is supervised by MITI’s Industrial Policy Bureau. IIP was established June 12, 1989, to contribute to the development of Japan’s industrial economy through R&D of information search systems for IPRs. IIP surveys and researches as well as collects and disseminates information regarding domestic and foreign issues promoting the appropriate protection of IPRs. In the fall of 1994, MITI formed a study panel, the Research Committee on Technological Standardization Regarding Intellectual Property Rights, within IIP in cooperation with universities and major electronics related companies such as NTT, Fujitsu Ltd., and Sony Corp. The panel is to discuss various matters to grope for the possibility of setting up new rules regarding technological standardization and intellectual property rights.

Founded in 1988 under the Science and Technology Agency as a central organization of research on science and technology policy in Japan. Conducts research activities in coordination with the Council for Science and Technology and other government agencies. The Science and Technology indicator Project Team published *Science and Technology Indicators: 1994* in January 1995 that includes an analysis of international patent trends.

Research activities are conducted by two kinds of research groups: theory-oriented, directed by university faculty researchers, and policy-oriented, directed by researchers with extensive administrative experience. NISTEP is a key government agency in fostering government-industry partnerships in S&T. A number of NISTEP reports are available in English.

Technical Journals

The following scientific journals are recommended by the U.S. Patent Office to supplement an understanding of Japanese science and technology and patents.

You should also consult the Japan Information Center of Science and Technology (JICST), a Science and Technology Agency-affiliated organization that collects and disseminates Japanese (and foreign) science and technology literature. JICST publishes a 12-part Japanese science and technology article citation series (by subject) *Current Bibliography on Science and Technology* in Japanese three times/month, semi-monthly, and monthly. JICST also has a good database system of technical publications.
